All good points. I'll certainly let the principals know.

Thanks, R.

I think you should also make it more clear that it will be occurring daily. Just a thought.

I also think we should clarify where the briefing is being managed from. Those are three different time zone locations, plus DC. Once we know who the official giving the briefing will be (should be the incident commander according to NIMS and PIO training or the deputy... but could be a political official like the Administrator) we should send out a new advisory with that info.
